# GI Hub InfraCompass

Set your infrastructure policies in the right  
direction

Morag Baird, Director, GI Hub

# What is InfraCompass?

Guide that assesses the performance of **infrastructure delivery** for 56 countries to help create the **best conditions**

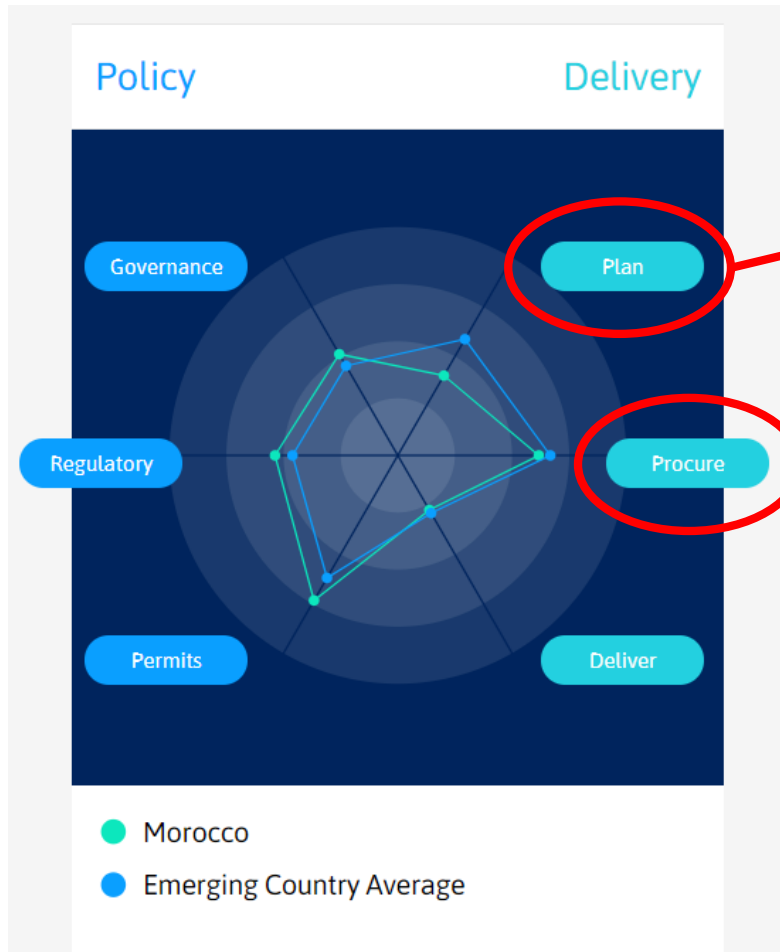

## Why?

1. **Demand** to understand how to unlock more investment and deliver quality infrastructure.
2. Focuses the data by identifying the 38 most important indicators for quality infrastructure delivery (from 138)

## How?

1. Filter the most important indicators for infrastructure delivery from 138 to 38
2. Assess each country's performance against the 38 indicators
3. Group performance scores into 6 major categories

# What does InfraCompass say?

Metric	Importance to infrastructure markets	Weighting within the element
Preparation of PPPs		45%
Procurement of PPPs		18%

- **Update – underlying data all updated to show development progress**
- **So what – a more obvious ‘so-what’ will be implemented to help users identify and prioritise reform**
- **New countries – An expansion of country-coverage that also creates greater alignment between tools.**

***Please talk to me if you want to be contacted at launch!***

**[Morag.Baird@github.org](mailto:Morag.Baird@github.org)**

- **Overall strong performance, particular strengths in Permitting, Planning and Delivery, due to:**
  - **Existence of infrastructure plan, guidelines for project appraisal, and pipeline – KPMG**
  - **Short times to obtain construction permits – World Bank**
  - **High infrastructure investment and quality – Oxford Economics & WEF**
